

## PROFILE

As a Front-End Developer with experience in React.js, my objective is to leverage my skills and knowledge to contribute to the success of a dynamic and innovative team. I strive to create high-quality, responsive, and user-friendly web applications that meet and exceed client expectations. I am committed to continued learning and development and am eager to collaborate with others to deliver exceptional results.

## PROJECTS

### E-COMMERCE STORE

- Developed and implemented a new checkout system using React and Redux Toolkit, resulting in a 20% increase in overall site conversions.
- Collaborated with cross-functional teams to optimize website performance, reducing load times by 30% and improving user experience.
- Created custom landing pages for promotional campaigns using React and Redux Toolkit, resulting in a 25% increase in click-through rates.
- Conducted A/B testing on various site features using React and Redux Toolkit, leading to data-driven decision-making and a 15% increase in revenue.

### SHORTLY URL SHORTENING API

- Developed and implemented a scalable URL shortening API using React, reducing page load time by 50% and improving user experience.
- Collaborated with cross-functional teams to identify and resolve technical issues, resulting in a 90% reduction in downtime and increased user satisfaction.
- Implemented analytics tracking and reporting features, providing valuable insights into user behavior and enabling data-driven decision-making.
- Optimized API performance through code optimization and

---

database tuning, achieving a 75% reduction in latency and improving overall website performance.

## MY PROFILE WEBSITE

- Our Profile Web Project is a modern and visually stunning web application built with React, Framer Motion, React Toastify, React Scroll, and Tailwind CSS. It provides a platform for users to create and showcase their professional profiles in a visually appealing and interactive way. The application uses smooth animations, responsive design, and intuitive navigation to offer a seamless user experience.
- The project is built with React, a popular JavaScript library for building user interfaces. React allows for a modular and component-based architecture, making it easy to maintain and scale the application. The use of React Hooks and functional components ensures that the application is lightweight and performant.

## SKILLS&TOOLS

**HTML5 | CSS3 | Javascript | jQuery | React.js |  
Redux Toolkit | Tailwindcss | Bootstrap | Next.js |  
Node.js | Express.js | Git & Github**

---

## EDUCATION

- **Sep 2020 - Bachelor of Science: Computer Science  
And Programming**  
**Current**      Thebes Academy-Giza

---

## CERTIFICATIONS

**Professional Front-End Developer**

Udacity | Issued Jan 2023

**Creating API Documentation**

Linked  Learning | Issued Dec 30,2022

---
